

Dear FCC:

I wanted to share with you the importance that satellite radio has mean to me since becoming available. My job requires that I travel during the week mostly by car. Satellite radio provides important and constant news stations for me as well as music genre that I prefer. This is not to mention the kind of instant and detailed traffic and weather information it also provides. This kind of information is not available on any broadcast radio station I have ever heard. At most, traffic is an after thought lasting seconds with few meaningful details that can really help a business traveler. I fully support satellite radio and ask you to allow them to provide more of the kinds of services that I increasingly need while traveling.

Thank you,

Bill Esposito
